

## Ethical Reasoning Competency Designation Request

Course Subject, Number, Title:

Faculty Member:

**I. Please describe briefly how your course meets *each* of the following learning outcomes. Students should be able to:**

- 1) Identify the moral and ethical dimensions of a personal or social issue (past or present)
  
- 2) Explain the moral and ethical principles used to resolve the ethical dilemma
  
- 3) Evaluate the moral or ethical decision reached (Typically this requires students to provide a reasoned evaluation of the decision and of the adequacy of the principles involved in reaching it. In the study of historical situations and in non-Euro-American contexts, however, the adequacy of the decision may be evaluated in terms of the moral framework of the society and the time in which the decision occurred.)

**II. Please include the portion of your syllabus that communicates the goals of this Competency Requirement to your students.**

**III. Assessment**

SACS requires the College to conduct a periodic assessment of the effectiveness of its general education courses. Accordingly, the following assessment mechanisms were established by the College to ensure compliance with SACS:

Students will complete a written assignment demonstrating each of the above learning outcomes and scored according to the ECMP rubric.

Your electronic signature below indicates that you agree to (a) implement the assessment mechanisms established for the ECMP and (b) submit to the Asst. Provost's office the documentation of your assessment results.
