 Program: Environmental Studies Minor
 Minimum Credits Required: _____

Environmental Studies Minor

Meet the Faculty

The interdisciplinary environmental studies major examines natural and cultural systems from many perspectives – ecological, economic, ethical, historical, geographical, and political. Students study the conservation and utilization of natural resources essential for economic development and public well-being.

The curriculum analyzes the problems, processes, and possibilities of creating a more sustainable society. It also offers preparation for an environmental career, broad background in several related areas of study, or concentration in a particular thematic issue as a basis for graduate study.

Florida offers an ideal laboratory for environmental studies. Nationally recognized projects such as the Everglades Restoration, Wekiva River Habitat Corridor, and models in the New Urbanism place Florida in the forefront of environmental protection and sustainable design.

Minor Requirements

Seven (7) courses are required: the five (5) core courses shown below and two (2) electives in environmental studies, one (1) of which must be at the **300 level** or above.

Course Name	Crs:	Term Taken	Grade	Gen Ed
ENV 130 - The Geosphere with Lab				
ENV 189 - The Environmental Crisis in its Cultural Context				
ENV 225 - The Biosphere w/Lab				
ENV 323 - Conservation of Biodiversity <i>Prereq(s):</i> ENV 130 or ENV 225.				
ENV 389 - Environmental Planning <i>Prereq(s):</i> ENV 130, ENV 189, and ENV 225.				

Notes:
